

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning on line 6 of page 1 with the following amended paragraph:

The present invention relates to a valve using-not using metal bolts etc. for connecting the valve body and the drive part so as to enable use even in a highly corrosive fluid or corrosive gas atmosphere and to a fluid system having that valve. More particularly, the present invention relates to a compact, easy-to-assemble valve and a fluid system having that valve.
